Summary

Software Engineer and full-stack MERN developer with a BSCS foundation in data structures, object-oriented design, databases, and software engineering. Build RESTful APIs and database-backed applications with React, Node.js, Express, MongoDB, and MySQL; experienced in JWT/RBAC, automated testing, and deterministic recommendation systems. IBM-certified; CGPA 3.7/4.0.

Experience

NextSkill Institute Jun 2026 - Sep 2026
Full Stack Development Trainee *Karachi, Pakistan*

- Completed NAVTTC/IBM-aligned full-stack training covering HTML5, CSS3, JavaScript, React, responsive multi-page, and e-commerce applications.
- Built and version-controlled portfolio, expense-tracker, and e-commerce projects using Git/GitHub.

10Pearls - 10Shine Program Certificate | Apr 2026 - May 2026
MERN Stack Development Intern *Remote, Karachi*

- Built the data model and REST API for a Notes application using React, Node.js, Express, MySQL, JWT authentication, email verification, CRUD, and search.
- Added Mocha/Chai tests, addressed SonarQube findings, and collaborated through GitHub pull requests and code review.

Self-Directed Learning & Development Sep 2022 - Present
Independent Study *Karachi, Pakistan*

- Built and deployed 10+ full-stack MERN applications with React, Node.js, MongoDB/MySQL, applying OOP, data structures, and database design.
- Used Git/GitHub and iterative, test-driven development workflows.

Projects

Smart Complaint Management System (MERN Stack) GitHub | Live Demo

- Implemented RBAC and a complaint-lifecycle state machine across 15 REST endpoints using React, Node.js, Express, MongoDB/Mongoose, JWT, and bcrypt; deployed frontend/backend on Vercel.

Notes Management Platform (Full-Stack) GitHub | Live Demo

- Built a React/Node/Express/MySQL notes platform with JWT/email verification, CRUD/search, Mocha/Chai tests, TiDB Cloud, and independent Vercel deployment.

NodeMart Marketplace Platform (MERN Stack) GitHub | Live Demo

- Built a MERN product marketplace with JWT authentication, owner-isolated CRUD, search, price filtering, and pagination; integrated Multer and Cloudinary for media uploads and deployed on Vercel.

Education

Sindh Madressatul Islam University Sep 2022 - Jun 2026
Bachelor of Science in Computer Science; CGPA: 3.7/4.0 *Karachi, Pakistan*

- **Relevant Coursework**: Data Structures, OOP, Database Systems, Software Engineering, Networks, Operating Systems

Certifications

IBM Full-Stack JavaScript Developer (Professional Certificate) Verify | Sep 2026
IBM, Coursera *Online*

Modern Web & App Development Training Mar 2026 - Present
Saylani Mass IT Training (SMIT) *Karachi, Pakistan*

Technical Skills

Languages: JavaScript, TypeScript, Python, Java, C++, C, SQL
Core Computer Science: Data Structures, OOP, RESTful API Design, Database Design, Unit Testing
Frontend Technologies: HTML5, CSS3, JSX, React.js, Next.js, React Router, Tailwind CSS, Context API, Redux Toolkit, Vite
Backend and APIs: Node.js, Express.js, REST APIs, Socket.IO, JWT, CORS, File Uploads
Databases and ORMs: MongoDB, MongoDB Atlas, Mongoose, PostgreSQL, Sequelize, MySQL, Turso (libSQL), SQL Server
Developer Tools: Git, GitHub, GitHub Actions, Docker, ESLint, Postman, SonarQube, Mocha/Chai, VS Code, NetBeans
Cloud and Deployment: Vercel, GitHub Pages, Railway, Netlify, Cloudinary
Soft Skills: Problem-Solving, Teamwork, Communication, Adaptability, Time Management
